Dear Friends:

For 69 years we have been supplying the market growers and florists of America with the very best quality seeds. This has entailed great expense in both the introduction of new and the perfection of existing varieties. We believe this expense has been justified, for year after year more growers are relying on Burpee for their seed.

You know that without good, reliable seed your own efforts would be wasted. We realize this fact, also, and you may be assured that we will continue to exert our very best efforts in supplying you with the Best Seeds that Grow.

In our buildings at Philadelphia, Pa. and Clinton, Iowa we are prepared to handle your orders carefully and quickly, but we suggest that you send your order to us as soon as possible as we expect some varieties to be sold out before the season is over.

Wishing you a very successful year,

Faithfully yours,

David Burpee

President

Cable Address—"Burpee" Philadelphia

If there is any farm more famous than all other farms in the world, it is Burpee's Fordhook, near Philadelphia in Pennsylvania. This experimental farm was founded by W. Atlee Burpee before the United States Government had any experiment stations. The next most famous and best known farm in the entire world is probably Floradale, near Santa Barbara, California. Just a few views of parts of these two farms are pictured on this page. Everything in the way of selecting and breeding is done so that only the Best varieties and the Best Seeds that Grow can be offered to Burpee customers.

Fordhook. College girls lived in the barn and pollinated tomato blossoms all summer to produce the new Fordhook hybrid tomato seeds.

GROWING
AND
TESTING
BURPEE
SEEDS

The wives of soldiers do the handwork on flowers on Burpee's Floradale Farms. They are morale builders, serving the nation at war.

Bill Hoag, manager of Burpee's Floradale Farms, is one of the most expert seed growers in the world. He is shown inspecting the carrot trials. He eats them raw for flavor and vitamins.

This picture shows just a small part of the flower testing grounds on Burpee's Fordhook Farms.

Petunias and all other important flowers are selected and scientifically bred at Floradale.

At Fordhook, acres are devoted to cucumber trials especially the new Burpee Hybrid cucumber.

At Floradale Farms in California the most modern machinery is used to harvest Burpee seeds.

Burpee's Red Tampala

Better than Spinach

This picture illustrates a full grown plant. When this size, break off clusters of leaves at tip of branches; then the plants will continue to produce all summer.

1376 Burpee's Red Tampala (Tăm-păl'-a) is equal in all respects to Burpee's Tampala, introduced by us last year, but instead of the leaves being green they are variegated green and red. When cooked, they have a different, sweeter flavor, probably due to the red pigment found along the midrib and extending out along the veins of the dark green leaves whose underside also is red. Prepared and served like spinach, it is appetizing and most delicious. Tampala is very high in Vitamin A, Burpee's Red having double the Vitamin A content of spinach.

Tampala is easy to grow, does well in hot weather and keeps on producing all summer. Sow seeds outdoors any time after the ground becomes warm. One sowing usually produces enough greens for the season. However, for a continuous supply of the most tender leaves, make several successive sowings, ten days or two weeks apart, and use the entire plants when 5 or 6 in. high. They should be ready in from 6 to 8 weeks. Where plants are grown singly, 2 ft. apart, they make a large, round plant 1½ ft. and more across and 2 ft. and more high; use the 4 or 5 inch tips of each branch and repeated cuttings may be made as new leaves and stems grow.

⅓ oz. 55¢; ¼ oz. \$1.00; ½ oz. \$1.85; oz. \$3.60; ¼ lb. \$14.00; lb. \$54.00.

Burpee's new hybrid vegetables

370 Burpee Hybrid Cucumber

60 days. High resistance to bacterial wilt, mosaic, and downy mildew are the outstanding attributes of this new hybrid white spine, slicing type cucumber. Vines are extremely vigorous, long lived and bear an abundance of well formed green fruits of handsome appearance, 8 in. long, $2\frac{1}{4}$ in. wide, square at both ends with medium seed cavity and crisp, white flesh of excellent quality. In

our trials, the Burpee Hybrid Cucumber produced a higher total yield and a larger percentage of fancy fruits than open pollinated varieties grown right alongside because the vines remained green and healthy, and continued to produce after the others had ceased.

1121 Fordhook Hybrid Tomato

60 days. A new early, ever-bearing, wilt resistant hybrid tomato noted for its uniformly shaped, smooth fruits, and the very heavy yield of the vigorous vines which begin to bear early and continue to produce profusely throughout the entire growing season. At Fordhook, it outyielded all other varieties for the year. Under general field conditions, the fruits are of medium size, averaging 5 ozs. in weight and larger when staked; oblate to globular in shape, an even scarlet-red in color, and mildly acid sweet in flavor. Plants are strong growing, spreading, semi-upright, with dense foliage which affords protection from sun scald.

BE SURE TO ORDER YOUR SEEDS EARLY THIS YEAR

Some varieties of seeds are in very short supply due to poor growing conditions last summer. Then, too, there has been an unusually heavy demand for vegetable seeds both wholesale and retail. Therefore, it is important that you place your order at once. Prices are based on our present supply and subject to change without notice.

Burpee's Alldouble Petunia

2440 America All-America Silver Medal Winner. The first Alldouble Petunia ever created in America. Plant habit is compact and uniform, 1 ft. high and 1½ ft. across. America Alldouble is among the first of the petunias to bloom and will continue to flower profusely until frost. It is of easy culture and vigorous growth. One of the finest and most novel of the new flowers. The rose-pink flowers, 2 in. and more across, come 100% true for doubleness. Ideal for beds, borders and pots. Stems may be obtained up to 10 in. in length which makes them highly adaptable for low vase use. The sticky substance found on the leaves and stems of most petunias is almost lacking. **100 seeds 40¢; 200 seeds 75¢; 1000 seeds \$3.00.**

Burpee's Early Flowering Sweet Peas

Varieties are arranged in each color class from deep to light shades

Burpee's Early Flowering Sweet Peas come into bloom outdoors before the summer heat arrives—3 to 4 weeks earlier than the Giant Spencer varieties offered on pages 56 to 60. They are valuable for winter flowering under glass, also especially adapted for growing in frost-free sections and for earliest blooms outdoors in the North. Sweet Peas do best in cool weather. If seed was not sown in the fall, sow as early in the spring as the ground can be prepared. They prefer an open, sunny location, and deep, rich soil which must be well drained.

White

3390 Burpee's White Magnificent large, frilled, pure glistening white flowers which are particularly sweet-scented. A splendid white-seeded white.

3395 White Giant* Flowers are extremely large, of the purest white, and perfectly placed in fours on long, strong stems. An extra choice white-seeded white.

Cream

3334 Oriental Deep cream or primrose flowers of large size and unusual beauty. Black-seeded.

Fawn Pink

3162 Golden Pink* Outstanding color—glowing golden or fawn pink; beautiful, especially under artificial light. Large, well-waved flowers.

3309 World's Fair Light golden cream faintly overlaid with a delicate suffusion of fawn, deeper toward the edges.

Cream Pink

3362 Peachblow Clear rose-pink on cream, the rose being more intense toward the edges. Entire flower is overlaid with an amber sheen. Prettily frilled.

3349 Burpee's Giant Pink* Lovely shade of pink blending with a pure soft rose into a marvelous clear rose-pink; most intense toward the edges. Large.

Spring Flowering Sweet Peas

Come into bloom outdoors between the Early and Giant Spencer classes. Plants are quite vigorous and what the flowers lack in size is made up by the heavy crop of blooms produced. Vines seem more heat resistant than other Sweet Peas. Under glass they are unusually free flowering and prolong the spring cutting season.

We offer three colors, each of which received an award in the All-America Selections:

3470 Blue Clear marine blue; free bloomer.

3479 Lavender Lovely soft shade of lavender.

3447 Rose Pink Beautiful rose-pink on white.
